

HEALTHY HOMES

Working to Improve Outcomes for Children with Asthma

A healthcare provider has identified that your child has been struggling to control their asthma, and has referred you for a free home assessment.

- Healthy Homes is a free program in Orange County that can help you take control of your child's asthma.
- Our team will visit you at home and identify things that may be making your child's asthma uncontrolled.
- You will also learn how to make your home healthier.

Breathe easier knowing your home is healthier.

To schedule a free home assessment, contact the Healthy Homes Coordinator:
kredd@orangecountync.gov or (919) 245-2379
