PREPARING FOR THE SITE EVALUATION OR SITE VISIT:

Improvement Permits for single-family dwellings on recorded properties and some Existing System Authorizations and Well Permits can be evaluated and visited without making appointments. Applicants may be given a placard to affix at the entrance to the site.

- Verify that the email and phone submitted are the best ways to reach the APPLICANT. Expect a call and/or email from the Environmental Health Specialist assigned to this application.
- All proposed structures must be staked.
- Property lines and corners must be clearly marked and accessible. If property lines cannot be verified, it will be necessary for the property to be surveyed before a determination can be made.
- Trim thick vegetation. The area may need to be "bush-hogged" or thinned out. Do not grade or excavate potential soil areas, as it is possible to damage sites beyond use.

Failure to prepare the site may cause long delays in permitting or may result in a *Notice of Incompletion*.

Please read before signing.

Acknowledgment: I, the undersigned, understand that I am the responsible party for making the site accessible for evaluation, permitting, and inspection purposes. Records, flags, and ribbon are available upon request.
