B.2 Live Releases for Placeable and Recovered Animals: June 2013⁽¹⁾

	Dogs	Cats	Others	Total	% of Total Dispositions
Reclaimed	31	3	0	34	12.45%
Adopted	62	81	4	147	53.85%
Transferred (2)	16	3	6	25	9.16%
Totals	109	87	10	206	75.46%

(1) Live Releases include all animals that are not euthanized, i.e., transfers to placement partners, returns to owners and custodians, and direct adoptions. The “live release rate” is calculated by dividing the live releases by the total number of *placeable* animals. To calculate placeable animals, we must remove the animals surrendered for euthanasia, feral cats, animals that arrive dead or die in our custody, bite quarantine animals, and animals that have been confiscated from the total number of animals dispositioned. For January, this number was 38, and removing these animals from the total number dispositioned leaves 273 “placeable” animals.

(2) Transferred to rescue organization

Totals	35	100.00%	59	100.00%	0	0.00%		

(1) “Behavioral” includes a wide range of behavioral issues that June prevent an animal from being available for adoption to the public. These issues vary widely between cats, dogs and other animals, and can include aggression, lack of socialization, severe kennel stress or other factors that make the animal a risk if placed back into the community.

(2) “Medical” includes a wide range of conditions and diseases that June prevent an animal from being available for adoption to the public due to unsound health. These conditions range in severity and differ greatly between cats, dog and other animals. Additionally, because we test animals for certain diseases as a standard protocol, these are often more easily identifiable and thus can be separated as a specific condition statistic. For example, the “Feline Leukemia” category above is listed separately, though it is a medical condition.
