~~~~~

## **DATA INSTRUCTION SHEET**

**Instructions:**

- 1 - Data you received is in .txt format. It is comma delimited.
- 2 - Save the data to your desktop or hard drive before attempting to use the data.

*Do Not attempt to retrieve the data directly from the media into your intended software.*

- 3 - Open whatever software spreadsheet you intend to use (Excel, Access, etc.) and retrieve this data into that spreadsheet.

\*\*Please note that different software programs handle different amounts of data. While Excel will handle most requests, it will not handle all. Our office has been told that Access will handle much larger amounts of data than Excel, however, our office is not familiar with that program.
