⁽¹⁾ Orange County has established three Proprietary Funds used to account for services provided to customers. All three Funds are established as enterprise funds and fees are imposed on customers to pay for the full cost of providing the services. The Water & Sewer Utilities Fund accounts for revenues and expenses related to the provision of sewer service. The Solid Waste Fund accounts for the revenues and expenses related to the provision of solid waste disposal and recycling activities. The Sportsplex Fund accounts for the revenues and expenses related to the services provided at the Triangle Sportsplex. All three funds are included as supplemental information and are not funded by the General Fund.

Project Description/Justification

The Article 46 (1/4 cent) Sales Tax was approved by the voters in the November 2011 election, and is effective April 1, 2012. The anticipated revenue generated is \$2,500,000 annually, with 50% of the proceeds for Economic Development initiatives, and 50% of the proceeds for Education (allocated by the ADM count of the two school districts). In FY 2011-12, proceeds are estimated at one-fourth of the annual amount, for a total of \$625,000.

The Sportsplex Fund is a self supporting Proprietary Fund that is used to account for revenues and expenses related to the operations of all Sportsplex Programs for the residents of Orange County. In FY 2014-15, the Mezzanine (Pool) will consist of dedicated fitness member change areas and lockers, and workout rooms for Zumba, high and low impact aerobics, and Yoga/Pilates. In FY 2015-16, the Mezzanine (Ice) - Phase 2 will provide additional fitness space to support the additional equipment required for member growth with particular focus on specialized units designed for seniors. Additionally, there will be a dedicated group cycling area for this high growth program and an advanced training center to handle group training programs. The appearance and function will be similar to the existing ice mezzanine. Also in FY 2015-16, the Children's Activity Center (Phase 3) will not only facilitate a 50% growth in After School and Summer Camp programs, but will facilitate programs focused on children's obesity through mini-gym based programs, children's martial arts, gymnastics, tumbling, and child appropriate dance classes.

Note 1: The Article 46 one quarter cent sales tax proceeds for schools (\$1,250,000 annually) is included in the Special Revenue Projects section of the CIP.

Note 2: School Construction is guided by the Schools Adequate Public Facilities Ordinance (SAPFO) projections of capacity and need.

⁽¹⁾ Pay-As-You-Go funds are assumed at a 1.5% annual growth throughout the 5 year CIP period. NOTE: additional PAYG funding is recommended in FY 2012-13 to reflect savings in debt service in FY 2012-13.

⁽²⁾ Lottery Proceeds are assumed at the same amount from the State throughout the 5 year CIP period. The funds will be distributed on the basis of each school systems Average Daily Membership.

Project Description/Justification

Funding for this project would allow approximately 11,000 square foot of area to the rear of the Emergency Services office at 510 Meadowlands to be developed as a gravel multi-function area in order to allow full utilization of the site during emergencies. The current grassy area would not support vehicular traffic, heavy staging of materials/supplies, set up of emergency services tents, etc. Current regulations require any area which exceeds 2,500 square feet to be engineered and constructed with site drainage and subsurface drainage pursuant to impervious surface requirements. Included for 2013: installation of sound deadening materials above the call center to reduce overhead noise; installation of a canopy at exterior access door to provide protection from elements; supply & installation of automatic openers for rool-up doors (safety issue), and improvements to multi-incident response vehicle (MIRV).

Project Description/Justification

These funds would support the removal of the Northern Human Services Center, or components thereof as determined by the County Commissioners. A deconstruction/demolition combination process is recommended, whereby a salvage operation would be conducted to remove items of value or with re-use potential, with the remaining areas removed using traditional demolition techniques. Most masonry products that cannot be reclaimed for direct reuse can be processed for use as an aggregate substitute. Costs for this operation include abatement of asbestos that is present in the building as well. In 2011 The Board expressed interest in removing the building, or parts thereof, and replacing it with a functionally superior and environmentally sustainable facility. Cedar Grove Day Care and Head Start staff were notified last year that the facility would be closed by January 31, 2013. Staff has met with a small group of community representatives at the Manager's request, and discussed conceptual ideas for site development. The Board received information during their January 24 ,2012 meeting which allowed for increased specificity in the project development description and consequently, the cost estimate for construction. Existing project funds are available for use in FY 2012-13 for the deconstruction/demolition of all, or part, of the building.

Project Description/Justification

The Seymour Center was originally designed to be “generator ready”, which means in the event of an emergency, a generator would be brought on site to provide power to the Center. Availability of equipment the size and type that would be needed has become increasingly difficult to access on an “on-call” basis. Availability, delivery, and set up within the timeframe needed to set up sheltering operations at this site cannot be guaranteed. In order to ensure the facility is prepared in the event it is called into service as a sheltering option, the purchase and installation of a permanent generator is recommended. Cost has been increased from prior estimates to account for inflation. Facility expansion needs identified by Dept on Aging staff will be identified as part of the Southern Orange Campus use planning process and will be incorporated in future CIP requests.

Project Description/Justification

In February 2007, the Board approved a master plan for the Southern Human Services Center site and in November 2010, authorized the preparation of a formal Master Plan for the campus, which included a Dental Clinic. In FY 2011-12 of the CIP, Medicaid Maximization funds were proposed to expand the Personal Health clinic and records areas at the Southern Human Services Center, as well as to improve patient flow. Development of a negative pressure room is a critical component of the work. The proposed Master Plan would include requirements associated with the needed SUP modification for separate site preparation activities that might be necessary to preserve the County's long-term development options at this location. Expansion of the existing building to accommodate future Human Services program needs is projected later in the plan to allow for the logical and timely development of master plan recommendations. A separate CIP request reflects preparation and preliminary development activities associated with the Southern Orange Campus Master Plan. NOTE: Available Balance reflects \$0 because the debt has not yet been sold.

Project Description/Justification

In February 2007, the Board approved a master plan for the Southern Human Services Center site and in November 2010, authorized the preparation of a formal Master Plan for the campus, which included a Dental Clinic. The proposed Master Plan would include requirements associated with the needed SUP modification for separate site preparation activities that might be necessary to preserve the County's long-term development options at this location. This project would support master plan preparation costs as well as preliminary site development activities not associated with specific existing buildings on the campus. Expansion of existing buildings as reflected in the Master Plan will be presented as a separate CIP request specific to those facilities. NOTE: Available Balance reflects \$0 because the debt has not yet been sold.

Project Description/Justification

Funding is provided for purchase of land should the County Commissioners choose to move forward with the development of a Southwest Branch Library. Additional resources in FY 2012-13 are recommended to replenish funds spent during the unsuccessful property acquisition in 2011. Design and construction costs are projected within a timeframe commensurate with debt capacity; and the timeliness of design prior to construction commencement. NOTE: Available Balance does not reflect the debt financing of \$436,000 because the debt has not yet been sold.

Project Description/Justification

Link Phase 2 is an ongoing project to develop a permanent public meeting room for County Commissioners. Results of preliminary on-going discussions regarding meeting room development at the Whitted Building will reduce the amount of funding required for this project. \$25,000 is required to complete needed ADA and building security work in the Link Center, so if the balance for the meeting room funding is moved to Whitted, \$25K should remain with this project to complete that work. NOTE: The Available Balance does not reflect debt financing of \$425,000, because the debt has not yet been sold.

Project Description/Justification

In the absence of compelling reasons to the contrary, geothermal is projected for all HVAC replacement projects recommended in this Plan. While initial costs come at a slight premium over conventional systems, the on-going operational cost savings (30-35% annually) and the speed at which the premium capital cost is recovered, outweigh the initially more expensive installation. For example, the Justice Facility, whose system has been in use since 2008, is on track to recoup the premium cost by 2016 and is experiencing a 30% savings in annual heating and cooling costs. The Link Government Services Center geothermal project includes the entire building and is currently nearing completion. This project is partially funded by ARRA grant funds. The system was sized in a manner that will accommodate any future development of a Commissioners meeting room. The remaining components of the Community Geothermal Project, recommended for funding in 2012/13, will serve the remaining facilities on the "East Campus", including the Jail, District Attorney's office, Historic Courthouse, Court Street Annex, and the Government Services Annex. UPDATE: The timing of work for remaining east campus buildings has been revised as follows: 1) the well field required to serve the Historic Courthouse, Jail, Court Street Annex and DA Building will be constructed in its entirety; 2) interior work will be completed for all facilities excluding the Jail, for which interior work will be completed following occupancy of the proposed new Jail (2016/17). This will allow interior work at the Jail to be completed at lower occupancy levels; 3) Should the Board choose to deconstruct or otherwise decommission the GSC-A--this project can be reduced by \$262,000; 4) All pricing has been updated to reflect actual costs from Link Center construction.

Project Description/Justification

Roofing replacement priorities are determined by a Roof Replacement Schedule prepared in 1998 and updated in 2003 and 2006. The Schedule will be updated in 2011-12 to reflect additions and divestitures since 2006. Individual projects and their anticipated funding period are itemized above. If a deconstruction/demolition combination process is not completed and the County keeps the Northern Human Services facility in service a new roof will be needed by 2013. **01/2012 UPDATE: Based on discussions to date, it has been assumed that at least a portion of the NHSC will be removed and will not require reroofing. As such, \$100,000 has been reallocated for reroofing of the Battle Courtroom. NOTE: The Available Balance does not reflect \$100,100 in debt financing, because the debt has not yet been sold.**

Project Description/Justification

The Affordable Housing project has been primarily funded with two General Obligation Bond Referendums, in 1997 and 2001. The purpose of the project is to fund low and moderate income housing in Orange County. The Board has awarded bond funds to local non-profit organizations to construct new homes, rehabilitate existing substandard properties and acquire land for future housing development. Local non-profit organizations pay impact fees at the time a new home is permitted. Once the home is constructed and occupied by low and moderate income residents the non-profit can request a reimbursement of paid impact fees per the County's policy. On November 1, 1995, the BOCC approved a policy for impact fee reimbursement to local non-profit organizations that met the established eligibility criteria. There are several potentially large refunds expected in the next few years, therefore in FY 12/13, \$170,000 is recommended to pay future impact fee reimbursements.

Project Description/Justification

The Information Technology project incorporates a number of technology improvement efforts the County plans to accomplish in the next five years. The improvements include, but are not limited to: server replacements and upgrades, desktop and laptop replacements, PC software upgrades, GIS software and hardware upgrades. \$50,000 has been included each year for Board of Commissioners technology initiatives. FY 2012-13 includes an additional \$200,000 to bring all County computers into Win7/Office2010 compliance (paid with available funds within the project), and \$250,000 for Library Management Systems software. NOTE: The Available Balance does not reflect debt financing proceeds of \$500,000, because it has not yet been sold

Project Description/Justification

The Register of Deeds Automation project is funded with fees collected by the Register of Deeds. The funding is mandated by NC General Statute 161-11.3 which requires all Counties to reserve ten percent of revenues collected and retained by the County in a nonreverting Automation Enhancement and Preservation Fund. The proceeds shall be expended on computers or imaging technology and needs associated with the preservation and storage of public records in the Register of Deeds Office.

Project Description/Justification

This is a new project for FY2013. The Manager is in the process of negotiating the purchase or lease of land adjacent to the State's prison facility on Highway 86 for a new Orange County Jail. A consultant has been retained to evaluate the site and determine the best configuration of the potential site, along with whatever constraints (environmental/regulatory for example) that might impact the development. Site related planning costs have been included at \$250,000 for FY 2013-14. Construction cost estimates from firms in the business of building detention facilities range from \$80,000 to \$120,000 per bed. The new jail is intended to house a minimum of 250 prisoners and contain support spaces needed for such a facility. While the estimate may be reduced at some point in the future as the project is more firmly developed, funding at the \$120K per bed level has been included in this request.

Project Description/Justification

Funding for FY 2012-13 includes: 1) 600 kW emergency power generator w/ 1000A ATS would be supplied and installed to meet the electrical needs of this facility during power outages. A smaller emergency generator at the site currently powers only refrigeration equipment for drug storage and very limited other critical areas. Since the Health Department will occupy the facility for the foreseeable future, emergency power sufficient to keep the clinics in operation during times of disaster is recommended. 2) Exterior door/storefront replacement is required to meet security, safety and accessibility needs for seven individual entrances at the Whitted Complex. 3) Card controlled access door installations would provide additional safety and security for this complex.

Project Description/Justification

To provide initial funding for an energy/utility "bank" that will provide funding for projects that reduce energy/water demand at County facilities. "Borrowed" funds would be repaid through annual savings/avoided costs from reduced energy/water use. Savings/avoided costs from utility line items in the AMS Facilities operating budget would be used for these repayments. Great concept that forward-thinking governments interested in environmental sustainability are employing.

Project Description/Justification

Additional Channels: Equipment and hardware on the existing towers in Orange County as well as the surrounding areas will be upgraded to allow for increased system capacity which will reduce busy signals received by field units during times of high demand. If the upgrades are not funded, the system will not be able to alleviate the current service/coverage issues. Channels and additional equipment will be added to the following locations based on the most current information from the state. Chatham Site: 3 channels/1 combiner; Hillsborough Site: 2 channels/1 combiner/1 antenna package. The tower is currently full and may require additional work to allow channels to be added; Laws Site: 3 channels; UNC Site: 2 channels. Site is maintained by UNC and may require additional work to add channels; Altamahaw Site: 1 channel; Mebane Site: 2 channels.

Towers: The addition of three towers over the next four years will expand coverage which in turn will increase capacity allowing better access for field units increasing safety and more stable interoperability. Can not be funded by 9-1-1 funds.

Note: This Viper Radio System project is being reviewed as part of the charge to the Emergency Services Work Group.

Project Description/Justification

Note: This Communications System Improvements project is being reviewed as part of the charge to the Emergency Services Work Group.

OSSI: Since 1992 Orange County has utilized a Computer Aided Dispatch system from the current vendor, Logysis. The system is outdated, unable to meet current demands and should be replaced in order to accommodate system needs. OSSI has a complete package that will provide a more robust and efficient system with needed modules already interfaced. This system supports data sharing between agencies and across jurisdictions; improves employee productivity by simplifying repetitive tasks; delivers real-time information across the entire Emergency Services spectrum including law enforcement, fire and EMS. OSSI is offering a five-year payment plan which includes equal payments over the five years with 0% interest. This proposal includes a turnkey hardware, software and services solution. **\$500,000 can be funded by 9-1-1 funds contingent upon the approval of the NC 9-1-1 Board.**

800 MHz Radios: Portable and mobile 800 MHz radios for all Public Safety Departments County-Wide have or will be reaching seven-years of age. Replacement is necessary to ensure reliability for emergency responders. Only the Emergency Services and Sheriff's departments are included in the CIP. It will be up to each individual municipal or rural department to fund their replacement radios. It is important to establish standard features and specifications for 800 MHz radios (portables and mobiles) to ensure system reliability, optimal integration with new platforms (P25) which will be placed in service by NCSHP/VIPER starting in 2013. Regardless of funding source or user, it is critical that units purchased be standardized to ensure integration, reliability and reduce potential for field failure. The replacement of radios for Emergency Services will be phased over the next five years. The County started purchasing new 800 MHz radios in 2004 and Year 1 (FY 2012-13) includes funding to replace these original radios plus sufficient radios for new staff and begin to replenish disaster radio cache. Years 6-10 includes funding of \$920,000 for replacement of Sheriff radios.

NextGen Phone System: Replacement of the main 9-1-1 switch, which is necessary to gain access to Internet (Next Generation) based services. The current switch will

have reached the end of its useful life and will no longer be supported by the vendor. If the switch is not replaced, the cost of repairs /maintenance/parts will become very expensive. There is a risk that parts for this equipment will not be available in the coming years. Based on the most current vendor consultation, the request is being made in year 2-FY 2013-2014.

9-1-1 Call Taker and Dispatch Software:

EPD: ProQA Dispatch Software integrates the National Academy Protocols with today's critical computer technologies and assists telecommunicators in quickly determining the appropriate response **specifically configured by local agency authorities**. ProQA guides dispatchers in providing relevant Post-Dispatch and Pre-Arrival instructions prior to units arriving on scene.

EFD: Fire Priority Dispatch system will allow all the benefits and safety features of a unified fire protocol system **based on fire department approved parameters** to combine with the latest in caller integration and response prioritization.

Smart 9-1-1: Allows citizens to enter information through a secure website that would be available in the event they need to call 9-1-1. When the citizen calls 9-1-1 the

Project Description/Justification

Emergency Services currently operates from five stations. Station 1 is the only EMS station owned by the County and is located in the former Animal Services building on Revere Road in Hillsborough. Other sites are either owned by other organizations or in need of significant retrofitting to support 24-hour operations. Future stations should have standardized layouts and features for crewmembers and vehicles, such as OSHA and ADA required systems, emergency generators, drive-through bays, and solar panel/green systems. Funds in Year 1 provide for planning/assessment of future EMS substations, and funds in Years 3 and 5 provide for land/construction of substations, with two additional substations in Years 6-10. Note: The strategic locations have not yet been determined and will be reviewed by the Emergency Services Work Group.

Project Description/Justification

The Blackwood Farm Park is a 152-acre site located midway between Chapel Hill and Hillsborough on NC 86 and New Hope Church Road. The adopted master plan includes a multi-faceted park that retains components of the farm's agricultural past, including community gardens and agricultural demonstration areas and exhibits. It also includes an amphitheatre, fishing, trails and open fields - as well as the proposed DEAPR Operations Base and Environmental Education Center. The Year 1 funding reflects potential for opening community gardens and a few limited activities by 2013, with the bulk of the park (and building) construction to come in year 6 and 7, design in year 5.

Project Description/Justification

The Conservation Easements component of Lands Legacy was funded in July 2002, and works to provide matching funds to acquire conservation easements to conserve prime or threatened farmland or sensitive natural areas in keeping with Board goals and Lands Legacy priorities. Generally, these lands have conservation values or agricultural operations to be enhanced and protected, the land stays in private ownership and is not publicly-accessible except upon landowner consent. Over 1,700 acres of conservation easement lands have been conserved to date, with over \$3.5 million in state/federal grants. However, funding for the program is committed and remaining funds will be exhausted during 2012. The County will continue to aggressively seek to leverage future funds through grants and partnership funding.

Project Description/Justification

The Upper Eno Nature Preserve encompasses several hundred acres of sensitive natural heritage lands, wildlife habitat and prime forests. Public Access Areas are envisioned at two locations - the Seven Mile Creek Preserve (at Moorefields and/or Mount Willing Roads) and the McGowan Creek Preserve (US 70 East). The Seven Mile Creek Preserve would also include a segment of the NC Mountains-to-Sea Trail en route to Hillsborough and Eno River State Park. This project is projected to begin in Year 4 with the Seven Mile Creek access areas and trail segments, as well as wildlife viewing areas and primitive camping. The McGowan Creek Preserve component construction would be envisioned for Year 8. Note: If we apply and receive grant funding earlier, then this project could move forward.

Project Description/Justification

The Lands Legacy Program, established in April 2000, is a comprehensive program to conserve and protect the County's most critical natural and cultural resources, including future parklands; natural areas, wildlife habitat and prime forests; watershed stream buffers; and historic and archaeological sites. Farmland preservation and some components of natural areas conservation also occurs through the parallel "Conservation Easements" account. Acquisition of the Bingham Township Park site and the continued acquisition of property for the Seven Mile Creek Preserve/Mountains-to-Sea Trail (Upper Eno Preserve) are the top two priorities for available funds. Currently, \$1,548,923 is available in this project. The County has and will continue to aggressively seek to leverage these funds through grants (\$5 million to date) and partnership funding. Prior Bond Authorization lapsed, so new financing is needed and recommended in FY 2014-15 (Year 3).

Project Description/Justification

Millhouse Road Park, a 79-acre site just north of Chapel Hill was acquired in 2004/2007 for a future park site. Discussion to date has focused on a soccer field complex, walking trails and other amenities. Staff-level discussions have been held with the Town of Chapel Hill (an adjoining landowner) about a joint project between the County and Town, a concept which was also broached in a BOCC work session of October 2010. A possible Phase II would add a gymnasium structure, identified as a mutual facility need by both jurisdictions. The proposed budget reflects a possible Town/County partnership concept. Note: The above listed dates are tentative, pending a formal agreement with the Town of Chapel Hill with an anticipated 50-50 funding arrangement.

<i>Total</i>	25,000	-	-	-	100,000	885,000	66,800	1,051,800	334,000

Project Description/Justification

The New Hope Preserve, including Hollow Rock Public Access Area, will feature hiking trails and environmental education signage throughout a 72-acre site owned by Orange County, Durham County and the Town of Chapel Hill. These costs are for Orange County facilities (parking, driveway, trails, kiosks and other low-impact amenities). Trails and amenities on the other partner lands will be funded by those jurisdictions, and one-half of the Orange County facilities (the most substantial area of the preserve) is projected for funding assistance from Durham and Chapel Hill, whose residents will benefit from the Preserve. Archaeological survey work is underway, with facilities to be designed in Year 3 and constructed in Year 4. Available Balance reflects \$0, because funds have not yet been received from Durham County or Chapel Hill. Note: Once a formal agreement is reached with both Durham County and Chapel Hill, this project will proceed as scheduled.

Project Description/Justification

Northeast District Park is a 142-acre site acquired in late-2007 as the future district park for northern Orange County. The site was acquired with the potential for appropriate co-located facilities in mind. A Preliminary Concept Plan was prepared by staff that identifies the most likely locations for different types of park activities, including a potential solid waste convenience center and possible emergency services facility within the park. No master plan has been developed. The property is currently land-banked and leased to a local farmer for cattle grazing pending future construction. Some small-scale site management duties are projected for Year 4.

Project Description/Justification

Twin Creeks (Moniese Nomp) Park is located along Old NC 86 north of Carrboro. Phase I of the park (Jones Creek Greenway) was completed in 2011. Funding for this Phase II of this park is projected to be in years 6-10. However, an opportunity to construct the main entry road may exist in 2013 in conjunction with shared roadway owner MI Homes (Ballentine subdivision). Potential participation in the road construction cost is reflected here, if the County chooses to participate. (If it does not participate, a longer, more costly segment of the road may be required in the future at the time of park construction.) A Phase III of the park would likely exist and be beyond the scope of Year 10. Note: Of the \$1,053,620 currently available in this project, \$623,000 is committed and will be transferred for use in the Artificial Turf Soccer Fields project.

Project Description/Justification

The Article 46 (1/4 cent) Sales Tax was approved by the voters in the November 2011 election, and is effective April 1, 2012. The anticipated revenue generated is \$2,500,000 annually, with 50% of the proceeds for Economic Development initiatives, and 50% of the proceeds for Education (allocated by the ADM count of the two school districts). In FY 2011-12, proceeds are estimated at one-fourth of the annual amount, for a total of \$625,000.

The Sportsplex Fund is a self supporting Proprietary Fund that is used to account for revenues and expenses related to the operations of all Sportsplex Programs for the residents of Orange County. In FY 2014-15, the Mezzanine (Pool) will consist of dedicated fitness member change areas and lockers, and workout rooms for Zumba, high and low impact aerobics, and Yoga/Pilates. In FY 2015-16, the Mezzanine (Ice) - Phase 2 will provide additional fitness space to support the additional equipment required for member growth with particular focus on specialized units designed for seniors. Additionally, there will be a dedicated group cycling area for this high growth program and an advanced training center to handle group training programs. The appearance and function will be similar to the existing ice mezzanine. Also in FY 2015-16, the Children's Activity Center (Phase 3) will not only facilitate a 50% growth in After School and Summer Camp programs, but will facilitate programs focused on children's obesity through mini-gym based programs, children's martial arts, gymnastics, tumbling, and child appropriate dance classes.

Project Description/Justification

In the mid-1980s, the decision was made to construct public sewer service in the Efland Community. The County's funding ran out before the entire community could be served, but there were approximately 80 residents remaining who had signed up to receive sewer and never did. The Central Efland portion of this project will provide sewer service availability to the majority of those properties that requested service 25 years ago, in addition to providing sewer availability to most of the rest of the Efland Community. The Northern Buckhorn project will be an extension of the City of Mebane's sewer system and will serve residents in the area along Buckhorn Road between the Interstate and the railroad tracks. This portion of the project is made possible by EPA Special Appropriations Grants that were earmarked by Congressman David Price and applied for by the County. The vast majority of the Central Efland project will be paid for by the remainder of the EPA grant and by a DENR State Revolving Loan Fund. An estimate of the debt service is shown above, based on the full loan amount of \$3,500,000, an interest rate of 2.445% and the maximum term of 20 years. The full loan amount of \$3,500,000 is a maximum line of credit. The debt service payments would be based on the actual amount used. Orange County will not be using the full \$3,500,000 line of credit since contracts were bid lower. When Orange County closes the project, the remaining monies will return to DENR and be 'reallocated' to an associated project known as McGowan Creek Outfall shown in a separate CIP project. Therefore, there will likely not be new debt above the original project noted herein.

Project Description/Justification

Lake Orange has been in operation since the late 1960s. Besides minor repairs and mowing of the dam, there has been no routine maintenance performed on the dam or spillway over the last 40 years. In 2009, engineering staff initiated an inspection of the dam by a qualified engineer to identify and quantify some suspected deficiencies in the dam and spillway. The result of this inspection was a report that prioritized several necessary repairs and suggested other ongoing maintenance items. The most urgent of these repairs are going to be completed this fiscal year and are part of the capital project listed above. Also included in the capital project listed is a project to modernize the gate technology at the Lake by installing a new gate that will be controlled electronically and can be monitored and adjusted remotely. After that, the routine maintenance suggested will not be part of a capital project, but will become part of the annual operation and maintenance budget for Lake Orange.

Project Description/Justification

This 400± acre area of the County has been designated an Economic Development District for about two decades, but has not seen the development originally envisioned. This is due in large part to having no water or sewer infrastructure available to support development. Design and ultimately construction of water and sewer infrastructure in this EDD will remove one of the barriers to development in the area. Design of water and sewer infrastructure to serve the Phase 2 portion of the Buckhorn-Mebane EDD is currently complete and under review by Mebane and Orange County staff. It is anticipated that the permits for the project will be obtained and the project will be ready to let for bids in Summer of 2012. The Phase 2 portion is generally the land that is bounded by Buckhorn Road to the west, Gravelly Hill Middle School to the east, the Interstates 40/85 to the north and West Ten Road to the south. This project is an estimate of the construction costs for water and sewer extensions to serve this Phase 2 area described above. This project includes approximately 7,500 linear feet of 10" sewer force main, 3,000 lf of 8" gravity sewer line, 5,000 lf of 12" gravity sewer line, 11,500 lf of 18" gravity sewer line, 11,000 linear feet of 16" water main and an upgrade to the existing pump station located near the Gravelly Hill Middle School. Though the project is shown here and has been designed as a whole, it may be broken into phases, depending on funding availability.

Project Description/Justification

This 350 acre area of the County has been designated an Economic Development District for about two decades, but has not seen the development originally envisioned. This is due in large part to having no water or sewer infrastructure available to support development. Design and ultimately construction of water and sewer infrastructure in this EDD will remove one of the barriers to development in the area. Design of water and sewer infrastructure to serve the Phase 3 & 4 will have to await the construction of Phase 2 portion of the Buckhorn-Mebane EDD with anticipated construction in earlier year CIP's. The Phase 2 portion is generally the land that is bounded by Buckhorn Road to the west, the Interstates 40/85 to the south and the railroad or Hwy 70 to the north. In Year 1, \$50,000 has been added to this CIP for future utility and access right-of-way in these portions of the Buckhorn EDD.

Project Description/Justification

Currently, the wastewater collected by the Efland sewer system is pumped 3 1/2 miles east to the Town of Hillsborough via a 10" force main. This project would construct the infrastructure necessary to send the wastewater collected by the existing system (circa 1988+), the proposed system extension and any future system extensions the opposite direction to the City of Mebane along West Ten Road. This fits into a long range strategy to ultimately turn over operation of the Efland sewer system to the City of Mebane pending an interlocal agreement.

Project Description/Justification

The Richmond Hills Pump Station was installed in 2001 to serve the Richmond Hills Subdivision built by Habitat for Humanity. According to Orange Water and Sewer Authority (OWASA), who perform our routine maintenance, the standard duty schedule is 10 years for pumps and controls and 20 years for generators. Because our current customer rates do not generate enough revenue to provide for a capital reserve, we are proposing to replace the pumps and controls at the 15-year mark. As a matter of policy, sewer lift stations should be limited if possible and/or operating rates or developer payment in lieu of capital reserve should also be considered. This project will include replacement of the pumps and electrical controls, addition of SCADA remote monitoring equipment and wet well rehabilitation, if necessary. Note: this project could go away if, and when, an interlocal agreement is reached with the City of Mebane.

Project Description/Justification

This 800 acre area of the County has been designated an Economic Development District for about two decades, but has not seen the development originally envisioned. This is due in large part to having no water or sewer infrastructure available to support development. Design and ultimately construction of water and sewer infrastructure in this EDD will remove one of the barriers to development in the area. This area is generally the land that is bounded by Mt. Herman Church Road to the west, the Interstates 40/85 to the north and old Hwy 10 to the south along the US 70 corridor. Orange County has recently entered into an agreement with the City of Durham wherein Durham will provide water and sewer service to this area and supervise the design and construction of the utility infrastructure necessary to provide service. Orange County will provide the financing for the construction and will have input into selection of the design engineer and contractor as well as the extent of the design.

Note 1: The Article 46 one quarter cent sales tax proceeds for schools (\$1,250,000 annually) is included in the Special Revenue Projects section of the CIP.

Note 2: School Construction is guided by the Schools Adequate Public Facilities Ordinance (SAPFO) projections of capacity and need.

⁽¹⁾ Pay-As-You-Go funds are assumed at a 1.5% annual growth throughout the 5 year CIP period. NOTE: additional PAYG funding is recommended in FY 2012-13 to reflect savings in debt service in FY 2012-13.

⁽²⁾ Lottery Proceeds are assumed at the same amount from the State throughout the 5 year CIP period. The funds will be distributed on the basis of each school systems Average Daily Membership.

Orange County Board of Commissioners Capital Funding Policy

Preamble

This capital funding policy is the product of extensive analysis and deliberation. The intent of this policy is to reflect greater priority than there has been historically on providing funding for County projects, with particular emphasis directed at enhanced upkeep of existing County facilities. The policy reflects the implementation of the Board of Commissioners' resolution of November 16, 2004 that the Board *"does hereby adopt in principle a policy of allocating a target of 60 percent of capital expenditures for school projects and 40 percent of capital expenditures for county projects over the decade beginning in calendar year 2005"*. This policy continues the County's principle and historical practice of funding all School and County related debt service obligations before allocating any other School or County capital funds for other purposes.

Long Range Capital Investment Plan

During January of each fiscal year, the County Manager shall present, to the Board, five-year County and School capital needs and funding plans in the form of a Capital Investment Plan. Each year, the Board of Commissioners shall conduct a public hearing on the Manager's Recommended CIP during March and subsequently adopt a five-year Capital Investment Plan (CIP) as part of the annual operating budget in June.

County and School recurring capital needs will be identified and reviewed during each annual operating budget cycle, and recurring capital appropriations will be approved by the Board of Commissioners as an element of each annual Orange County Budget Ordinance.

The five-year plan for long-range capital funding shall include anticipated County and School capital expenditures costing \$100,000 or more.

Sources of Funds

The County will allocate the following sources of funds for County and School debt service and long-range and recurring capital:

- All proceeds from the Article 40 and Article 42 half-cent sales taxes.
(The North Carolina General Statutes require that 30 percent of the Article 40 (NCGS§105-487(a)) and 60 percent of the Article 42 (NCGS§105-502(a)) sales tax revenue be earmarked for public school capital outlay as defined in NCGS§105-426(f) or to retire any indebtedness incurred by the county for these purposes)
- School Construction Impact Fees for each school system.
- Property tax revenue as needed and approved by the Board.

- The County will budget NC Education Lottery proceeds as the revenues are distributed by the State each quarter, once the revenues are identified for an individual school capital project and requested by each district.

Debt Service

All County and School related debt service obligations would be funded prior to allocation of programmed funding for any other capital purposes.

Orange County Schools' impact fees will be earmarked to pay for debt service on projects that involved the construction of new school space in the Orange County Schools system. Chapel Hill-Carrboro City Schools' impact fees will be earmarked to pay for debt service on projects that involved the construction of new school space in the Chapel Hill-Carrboro City Schools system. These expenditures will be tracked and verified by each district annually.

NC Education Lottery Proceeds

Each school district will have the option to dedicate its share of the annual NC Education Lottery monies to address school facility renovation needs or as additional revenue to the districts pay-as-you-go funding to address school facility renovation needs. Annually either district can request that the County dedicate Lottery proceeds to repay debt service and the county will substitute pay-as-you-go-funding to expedite approved capital projects in the schools capital improvement plan.

Allocation

Capital funding for each five-year capital planning period will be allocated between the two school districts based on the student membership planning allotments, provided by the NC Department of Public Instruction by March 1 of each year.

Capital Project Ordinances – Form and Purpose

All funds allocated to capital projects are to be accounted for in a Capital Project Fund as authorized by a Board of County Commissioner approved Capital Project Ordinance.

The Capital Project Ordinance will include a detailed break down of each major cost category related to the project.

In accordance with the Board of County Commissioners November 2000 adopted *“Policy on Planning and Funding School Capital Projects”*, whenever School capital project bids are either higher or lower than originally projected, or any other factor affecting the project budget occurs, the affected school system is expected to work with County Management and Budget staff to present revised capital project ordinances for adoption by the Board of Commissioners. The same expectations shall be applicable for changes to County Capital project budgets.

Community Use of Schools

It is the intent of the Board of County Commissioners to evaluate each new proposed school in both School Districts for joint community use opportunities, including, but not limited to, park and recreation use.

Schools Adequate Public Facilities Ordinance

Orange County's Schools Adequate Public Facilities Ordinance (SAPFO) and Memoranda of Understanding (MOUs) between the County and its municipal and school partners establish the machinery to assure that, to the extent possible, new development will take

April 5, 2011

place only when there are adequate public school facilities available, or planned, which will accommodate such new development. The Board of County Commissioners is committed to the principle that new school space documented as needed through the annual SAPFO technical review process will be reflected in the next adopted CIP, and will be funded so as to be constructed to be available before the relevant level of service threshold is exceeded.

Rescission

This policy supersedes any policy in place prior to this date.

April 5, 2011

ORANGE COUNTY BOARD OF COMMISSIONERS DEBT MANAGEMENT POLICY

The County has long recognized the importance of proper long-range planning in order to meet capital improvement needs as they arise without experiencing dramatic impacts on operational cost and debt service. The following policy statements will provide guidance on the issuance of debt to help insure that the County maintains a sound debt position and that its credit quality is protected. In conjunction with the County's Capital Policies, these policy statements rationalize the decision making process, identify objectives for staff to implement, and demonstrate a commitment to long term financial planning objectives. In addition, this debt management policy will allow for an appropriate balance between the established debt parameters and providing flexibility to respond to unforeseen circumstances and new opportunities.

POLICY STATEMENTS

Purpose and Type of Debt

1. Incurrence of debt or long-term borrowing will only be used for the purpose of providing financing for capital projects to include, but not limited to:
 - a. Construction of new School and County facilities
 - b. Renovation and repair of existing School and County facilities
 - c. Acquisition of real property (land and/or buildings)
 - d. Construction or expansion of Public Utilities.
 - e. Providing funds for Affordable Housing Projects
 - f. Construction, acquisition and development of Parks
 - g. Purchase of major equipment

Debt issuance will not be used to finance current operations or normal maintenance.

2. The types of debt instruments to be used by the County include:
 - a. General Obligation Bonds
 - b. Bond Anticipation Notes
 - c. Installment Purchase Agreements (private placement)
 - d. Special Obligation Bonds (landfill only)
 - e. Certificates of Participation, when feasible
 - f. Revenue Bonds
3. All debt issued, including installment purchase methods, will be repaid within a period not to exceed the expected useful life of the improvements or equipment financed by the debt.
4. The County will not issue tax or revenue anticipation notes.

ORANGE COUNTY BOARD OF COMMISSIONERS DEBT MANAGEMENT POLICY

The County has long recognized the importance of proper long-range planning in order to meet capital improvement needs as they arise without experiencing dramatic impacts on operational cost and debt service.  - g. Purchase of major equipment

Debt issuance will not be used to finance current operations or normal maintenance.

2. The types of debt instruments to be used by the County include:
 - a. General Obligation Bonds
 - b. Bond Anticipation Notes
 - c. Installment Purchase Agreements (private placement)
 - d. Special Obligation Bonds (landfill only)
 - e. Certificates of Participation, when feasible
 - f. Revenue Bonds
3. All debt issued, including installment purchase methods, will be repaid within a period not to exceed the expected useful life of the improvements or equipment financed by the debt.
4. The County will not issue tax or revenue anticipation notes.

Purpose and Type of Debt (continued)

5. The County will not issue bond anticipation notes with maturities in excess of one year.
6. The County will strive to maximize the use of pay-as-you-go financing for capital improvements.

Issuance of Debt

7. The County will strive to issue bonds no more frequently than once in any fiscal year. The scheduling of bond sales and installment purchase decisions and the amount of bonds to be sold and installment financing to be sought will be determined each year by the County Commissioners. These decisions will be based upon the identified cash flow requirements for each project financed, market conditions, and other relevant factors. These factors will be ascertained from the school systems and County departments. If cash needs for bond projects are insignificant in any given year, the Board may choose not to issue bonds. Instead, the Board may fund up front project costs and reimburse these costs when bonds are sold. In these situations the Board will adopt Reimbursement Resolutions prior to the expenditure of project funds.
8. The County will seek level or declining debt repayment schedules and will avoid issuing debt that provides for balloon principal payments reserved at the end of the term of the issue.
9. The County will avoid over-reliance on variable rate debt. Variable rate debt will only be considered when market conditions favor this type of issuance. When variable rate debt is considered, careful analysis will be performed and techniques applied that will ensure that the County's sound debt position will be maintained. At no time will variable rate debt exceed 20% of the County's total outstanding debt.
10. The County is required by Statute to issue general obligation debt through a competitive process. The competitive process will also be used for other debt issuance unless time factors, interest rates or other factors make it more favorable to the County to use a negotiated process.
11. In the planning process for debt issuance the County will assess the need to maintain its "Bank Qualification" if installment purchase financing is being considered.

Level of Debt

12. The County will maintain its net bonded debt at a level not to exceed three percent of the assessed valuation of taxable property within the County.
13. The County will strive to maintain its annual debt service costs at a level no greater than fifteen percent of general fund revenues, including installment purchase debt. This is a recommended “best practice” from the Government Finance Officers Association.

Advance Refunding of Debt

14. The County will make every effort to issue advance refunding bonds to achieve cost savings of at least 3% percent net of the refunding bonds. Net savings includes gross savings less issuance costs and any cash contributions to the refunding. The 3% savings is the minimum savings permissible before the North Carolina Local Government Commission will consider advance refunding bonds. These decisions will be based upon the maturity date of the refunded bonds, the call date and premium on the refunded bonds and the interest rates at which the refunding bonds can be issued.

Undesignated Fund Balance

15. The County will strive to maintain an undesignated balance in the general fund of 17% percent of budgeted general fund operating expenditures each fiscal year. The amount of undesignated fund balance maintained during each fiscal year should not fall below 8% percent of budgeted general fund operating expenditures as recommended by the North Carolina Local Government Commission.
16. To the extent that general fund undesignated fund balance exceeds 17% percent the balances may be utilized to fund capital expenditures or pay down outstanding County debt.

Investment of Capital Funds

17. Investment of capital funds will be performed in accordance with the North Carolina General Statutes (159-30). Funds will be invested in instruments that will provide the liquidity required to meet the cash flow needs of each project funded.

18. Investment earnings on capital funds, after subtracting required or potential arbitrage, will be used for project costs and/or debt service.

Bond Ratings

19. The County will maintain good communications with bond rating agencies regarding its financial condition and will follow a policy of full disclosure on every financial report and offering statement.
20. The County will strive to maintain bond ratings at or better than AAA (Fitch), Aa2 (Moody's Investor Services) and AA+ (Standard & Poor's).

Arbitrage Rebate and Secondary Market Disclosure Requirements

21. The County will comply with all arbitrage rebate requirements as established by the Internal Revenue Service and all secondary market disclosure requirements established by the Securities and Exchange Commission.
22. Arbitrage will be calculated at the end of each fiscal year and interest earned on investment of bond or installment purchase proceeds will be reserved to pay any penalties due.

Enterprise Funds

23. For any Enterprise Fund that is supporting debt, an annual rate study will be performed to ensure that fees or rates are sufficient to meet the debt service requirements.

Capital Reserve Funds

24. The County will create and maintain capital reserve funds as appropriate, such as for school and county projects.
25. The Capital Reserves will be funded from property tax revenues, sales tax revenues and/or any other revenue source that the County Commissioners may choose.
26. Funds accumulated in the Capital Reserve Funds will be used on a pay-as-you-go basis to finance renovations and repairs to existing buildings and the purchase of major equipment. The Board may also choose to fund other pay-as-you-go initiatives from Reserve Funds.

5-Year Capital Investment Plan (CIP)

27. The County will review and adopt a five-year CIP annually.

28. This Debt Management Policy will be incorporated into the CIP.

29. The County will strive to include plans for debt issuance within the CIP.

Rescission

This policy supersedes any policy in place prior to this date.
