

**POPULATION COUNTS AND NON-ADJUSTED PROJECTIONS 1990 TO 2050
FOR ORANGE COUNTY TOWNSHIPS AND MUNICIPALITIES**

Prepared by the Orange County Planning and Inspections Department, April 2011

The population projections contained herein are based strictly on previous mathematical growth rates, and do not include adjustments for amount of developable land; economic trends or conditions; current land use policies; and/or other similar factors. The constraints of land and policy on projected populations will be factored in as coordinated land use conditions and policies unfold.

Notes and Sources:

1 The Population figures for 1980, 1990, 2000, and 2010 are from the US Census.

2 The Average 10-Year Growth Rate is the average between the 1990 to 2000 and 2000 to 2010 growth rates.

3 The Township and Municipality Population Projections for 2020 to 2050 are based upon the population figure for the previous timeframe multiplied by the Average 10-Year Growth Rate, which is the growth figure. The growth figure is then added to the previous timeframe figure to get the projected population (i.e. for Bingham Township from 2010 to 2020: $6,527 \times .123 = 803$; $803 + 6,527 = 7,330$). The Population Projections for the Unincorporated areas in Townships with Municipalities was determined by subtracting the Municipal populations from the total population for the Township. The Population Projections for the County from 2020 to 2050 are based upon the sum of the population figures for each of the Townships.

4 For the municipalities, only the portions within Orange County are included. The Town of Chapel Hill's population figures do not include portions in Durham County, and the City Mebane's population figures do not include the portions in Alamance County.
