Responding to concerns expressed by county health department directors about inconsistent shipments of doses, NCDHHS will provide each county health department a base allotment of doses for each of the next three weeks, based on county populations, to ensure a more equitable distribution. Orange County will receive a minimum of 200 first doses for each of the next three weeks. In addition, NCDHHS will provide the health department an additional 400 doses for next week.

Orange County will provide an update each week on Tuesdays with how many allotments the health department received for that week.

## Confirmed Orange County Cases by: Age

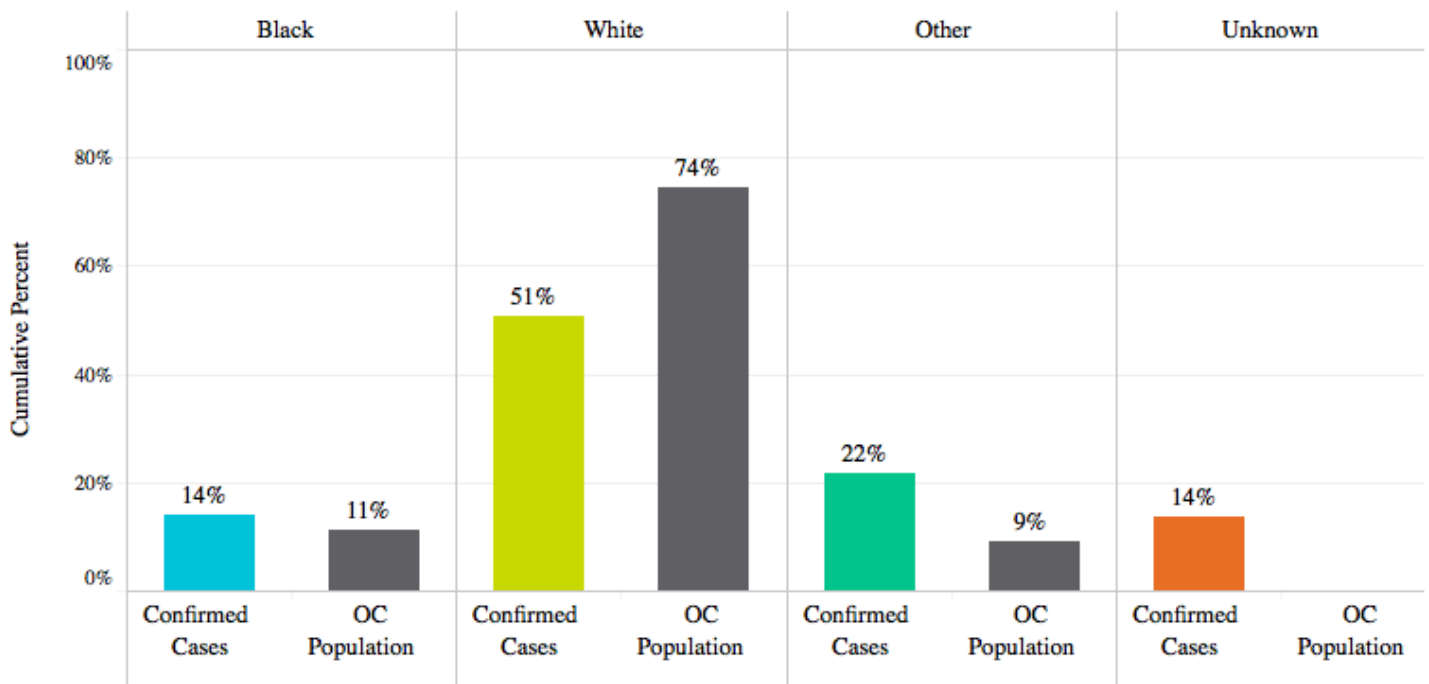

## Gender

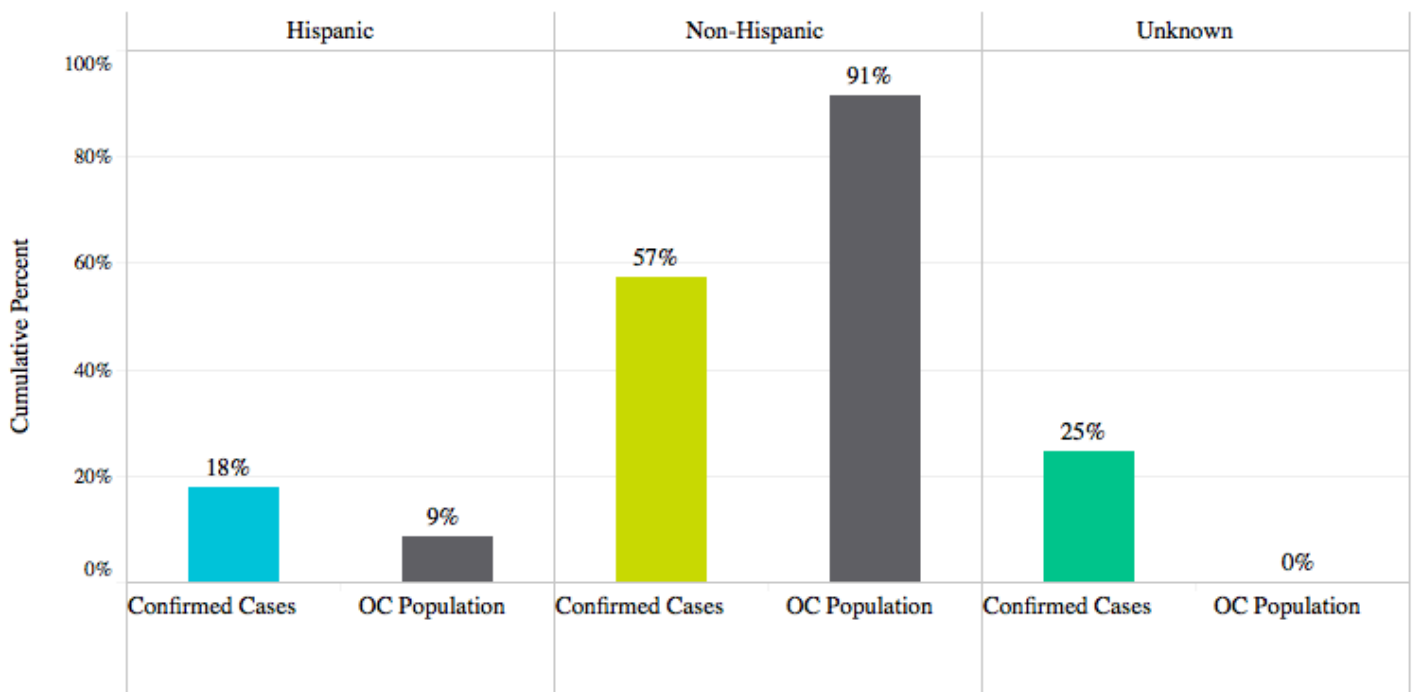

Data featured in this dashboard is based on the North Carolina COVID-19 Surveillance System (NC COVID), which publishes laboratory-confirmed COVID-19 cases, deaths, and other demographic information. Publishing of NC COVID data is one day behind the publishing of the COVID-19 North Carolina Dashboard. As such, daily counts of confirmed cases may differ slightly.

## Confirmed Orange County Cases by: Race

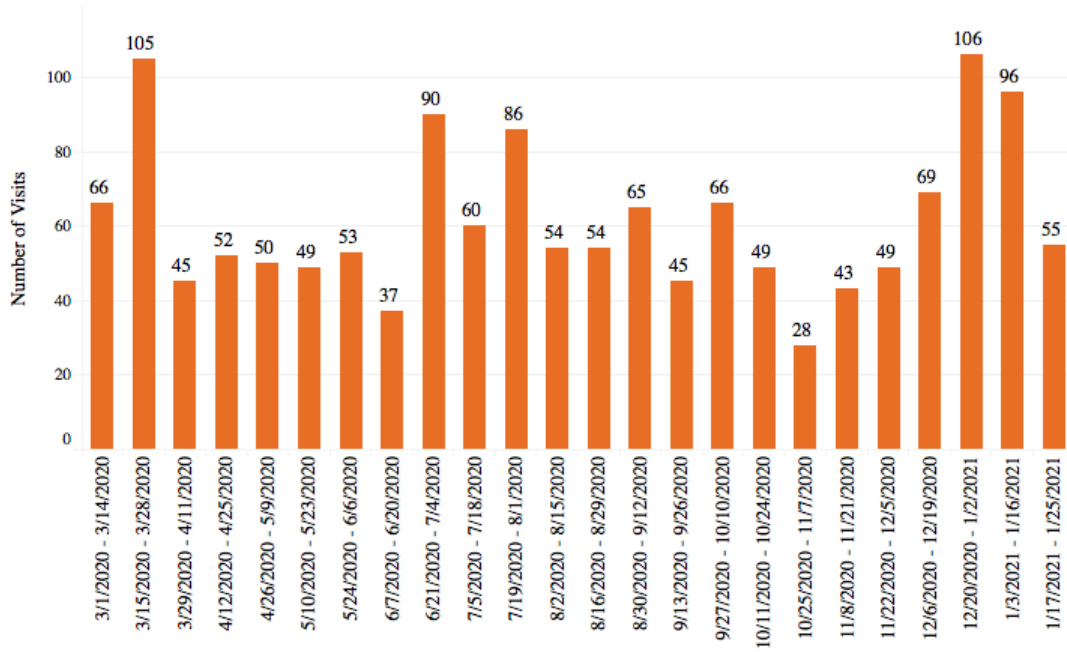

## Ethnicity

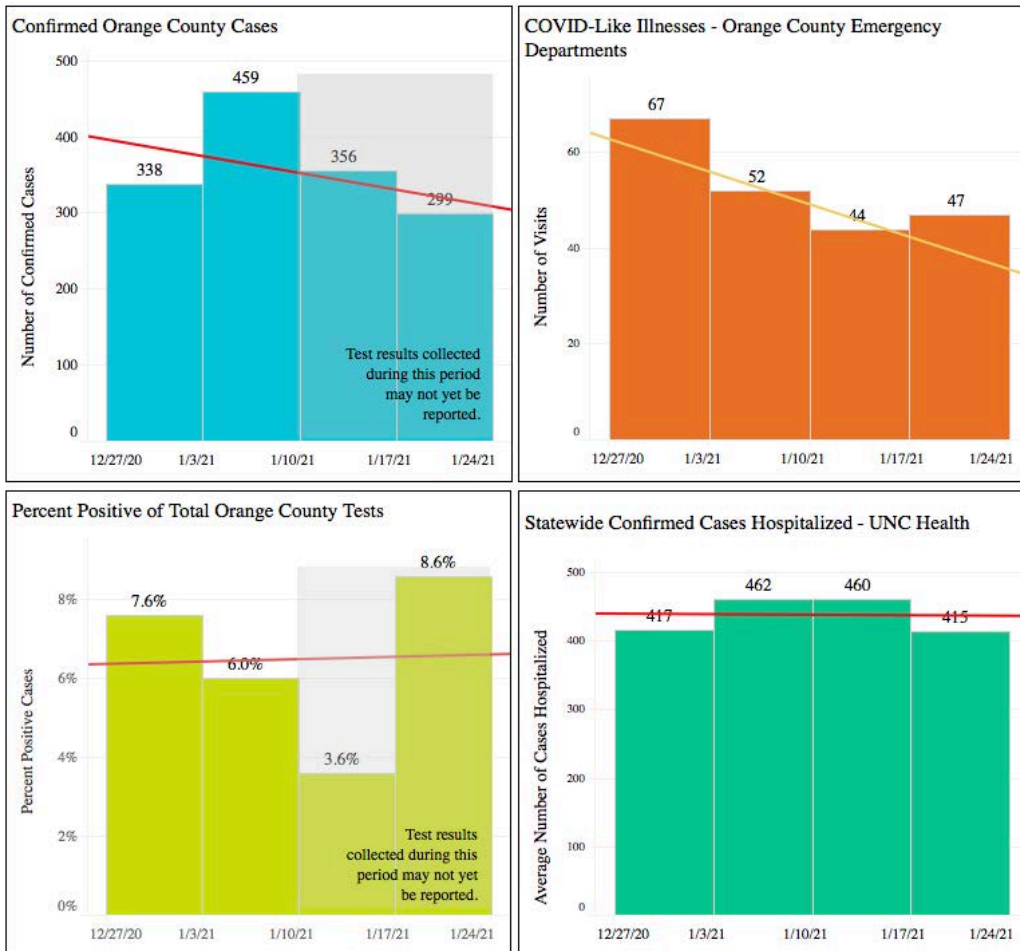

The Orange County Health Department uses the COVID-19 North Carolina Dashboard to update daily case counts and deaths Monday through Friday. Demographic data from NC COVID is updated on Tuesdays and Thursdays. For county case data on Saturdays and Sundays, visit the COVID-19 North Carolina Dashboard at:

## COVID Trends - Recent 4 Weeks

## Daily and Cumulative Confirmed Orange County Cases

Demographic groups with very small numbers have been suppressed to protect resident confidentiality. Race and ethnicity data is missing for approximately 15% to 25% of all confirmed cases. Additionally, the dashboard only includes data from residents that have been tested. As a result, this data should not be used to make generalizations about infection rates for any segment of the resident population.
