828,577

Antigen Positive Cases

138,944

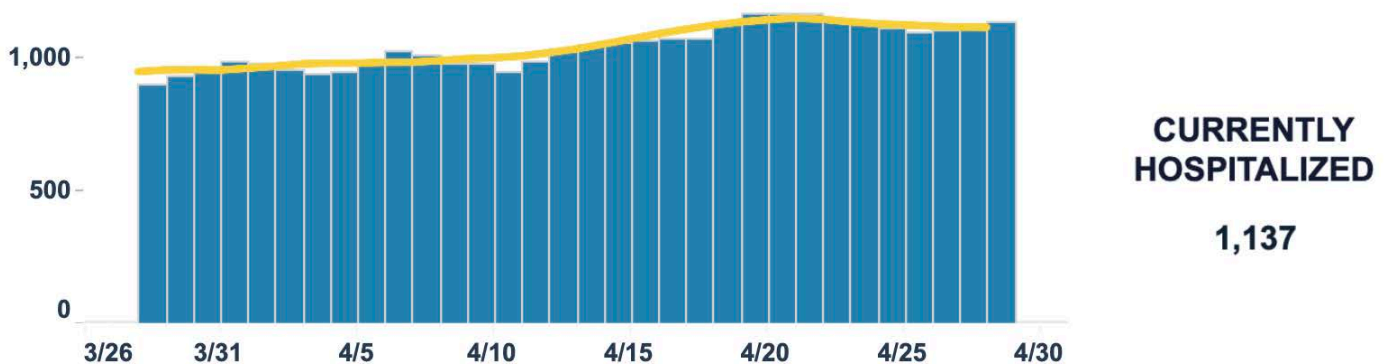

Cases by Race for Orange County

Cases by Ethnicity for Orange County

Daily Number of People Currently Hospitalized

Demographic groups with very small numbers have been suppressed to protect resident confidentiality. Race and ethnicity data is missing for approximately 15% to 25% of all confirmed cases. Additionally, the dashboard only includes data from residents that have been tested. As a result, this data should not be used to make generalizations about infection rates for any segment of the resident population.
