**Ethnicity**

## Cases by Age for Orange County

## Cases by Gender for Orange County

## Daily Cases

### TOTAL CASES

987,837

Molecular (PCR) Positive Cases

843,797

Antigen Positive Cases

144,040

## Cases by Race for Orange County

## Cases by Ethnicity for Orange County

## Daily Number of People Currently Hospitalized

Demographic groups with very small numbers have been suppressed to protect resident confidentiality. Race and ethnicity data is missing for approximately 15% to 25% of all confirmed cases. Additionally, the dashboard only includes data from residents that have been tested. As a result, this data should not be used to make generalizations about infection rates for any segment of the resident population.

### Public Health Chat for May 2021

A conversation with Orange County Health Director, Quintana Stewart, and the mobile vaccination team. The Pfizer COVID-19 vaccine is now authorized to include adolescents 12 through 15 years of age. This means that all people ages 12 and up are eligible to be vaccinated against COVID-19. We discuss how to get vaccinated, answer common questions about the vaccines (starting at 4:09) and talk to the mobile vaccination team (starting at 6:32) about their work with homebound community members.
