OCEMS Protocol App

OCEMS now officially has widely accessible digital protocols! Below you will find Android and iPhone QR codes to access and download the application to your smart device. With the partnership with Acid Remap, this application will be the most up to date source of the Orange County EMS Patient Care Protocols, Procedures, and Policies. By the **end of this month**, the application WILL be available on the OCEMS Medic and Supervisor Phones, as well as Truck iPads for ease of availability.

While all efforts will be taken to ensure that up to date protocols are available on the agency website. Use of the application, however, will alert you of any updates that are made within it. We are currently working to improve the inter-protocol connectivity for ease of navigation as well. Expect an update before the end of August.
