

Help Emergency Services, Police,
and Fire Departments

FIND YOU!

It is important to have your home marked with a highly visible address sign in case of an emergency.

- Numbers should be a **minimum of 4 inches tall** with high-contrast lettering.
- **Signs should be two-sided**, so they are visible from both directions of travel.
- **Use a reflective sign** so it may be seen day or night.
- If your residence is **within 75 feet of the road**, you can place the house number on the **corner of your house closest to the street**
- If your home is **further than 75 feet** from the road, please post the address sign **at the entrance to your driveway**.

You may purchase a sign, or some local fire departments offer them for sale.
