

Public Comment Meeting Section Content

After the Master Aging Plan is drafted, it is important to solicit feedback from the public to ensure that the content resonates with them and there are not blatant omissions or misunderstandings. It is, after all, a community driven plan! The Orange County Department on Aging posted the Master Aging Plan on its website and provided an email address to send comments to; left physical copies of the Master Aging Plan at county libraries; and held two public comment meetings.

This section includes a poster that was used to invite the community to the meetings, and a template to collect comments during meetings.
